

FY07 Environmental Quality Incentives Program (EQIP) Comprehensive Nutrient Management Plan (CNMP) Payment Schedule - DAIRY

Summary for F07EQIP CNMP Initiative																				
Base Farm number of animals	< 100	100 to 200	> 200																	
	Dairy Cattle	Dairy Cattle	Dairy Cattle																	
NEW Plan/ Operation/ Expansion for 50% animal numbers																				
Animal Unit CNMP	\$3,950	\$4,940	\$6,420																	
Acre CNMP	\$4,080	\$5,100	\$6,630																	
Acre CNMP - Export	\$2,040	\$2,550	\$3,315																	
Definitions																				
New Plan:				A CNMP for an operation that did not previously have a CNMP.																
New Operation:				A newly constructed livestock operation with a waste management system.																
Existing operation with 50% expansion:				A livestock operation with a CNMP that increases by 50% or more of the original animal numbers addressed by the existing CNMP.																
Animal Unit CNMP:				The planning activities for the manure and waste handling components of the system. This will be engineering related information.																
Acre CNMP:				The planning activities for the land treatment practices and nutrient management aspects of the system.																
Acre CNMP - Export:				A livestock operation that exports 50% or more of the manure or organic products (including mortalities).																
Export:				Manure or organic material that is transferred to another owner with documentation in written record of transfer.																
Base Farm number of animals	< 100	100 to 200	> 200																	
	Dairy Cattle	Dairy Cattle	Dairy Cattle																	
Existing Plan Revision for operations that have a plan that is revised. Includes expansion up to 50% of animal numbers																				
Animal Unit CNMP	\$2,770	\$3,460	\$4,500																	
Acre CNMP	\$2,860	\$3,570	\$4,640																	
Acre CNMP - Export	\$1,430	\$1,785	\$2,320																	
Definitions																				
Existing operation with less than 50% expansion:				A livestock operation with a CNMP that increases by less than 50% of the original animal numbers addressed by the existing CNMP.																
Existing Plan Revision				A livestock operation with a CNMP that needs to be revised due to changes in the operation not addressed by the existing CNMP.																
Animal Unit CNMP:				The planning activities for the manure and waste handling components of the system. This will be engineering related information.																
Acre CNMP:				The planning activities for the land treatment practices and nutrient management aspects of the system.																
Acre CNMP - Export:				A livestock operation that exports 50% or more of the manure or organic products (including mortalities).																
Export:				Manure or organic material that is transferred to another owner with documentation in written record of transfer.																
Instructions for Use																				
The activities associated with the development of a CNMP have been divided into 2 categories																				
Animal Unit CNMP and Acres CNMP (Export CNMP is an option for Acres). The Total Plan includes both categories.																				
Step 1: Locate the Base Farm number of animals that reflects the species and number of animals for the waste management system.																				
Step 2: Follow column to row that corresponds to proper category. Can not include both Acre CNMP and Acre CNMP - Export.																				
Step 3: Select maximum payment for plan. A total plan may be the sum of the Animal Unit CNMP and Acre CNMP payments. Export CNMP is an option instead of Acre CNMP.
